GERATI PLATO®

PORTABLE LAPAROSCOPY TRAINER

GERATI PLATO Laparoscopic Endo Trainer is a portable device designed for mastering laparoscopic skills, intended for surgeons, gynecologists and urologists as part of their professional training program. The set includes a portable trainer, high definition (HD) laparoscopic camera, training exercise task modules, a set of laparoscopic instruments, exercise instruction manual and a shoulder carrying bag.

THE DEVICE IS PORTABLE & LIGHTWEIGHT AND HENCE HIGHLY MOBILE AND FUNCTIONAL.

Endo Trainer can be folded to a compact size making it easy to carry in a sling bag (provided with this trainer set). The convenience of being highly portable makes this model popular since it creates the provision of surgical skill training anywhere and at any time.

The box trainer has 6 front and 2 side ports & instrument insertion positions which allows the assumption of correct posture while training and the accurate wrist positions during working.

ESSENTIAL FOR
EXCELLENCE

ENDO TRAINER

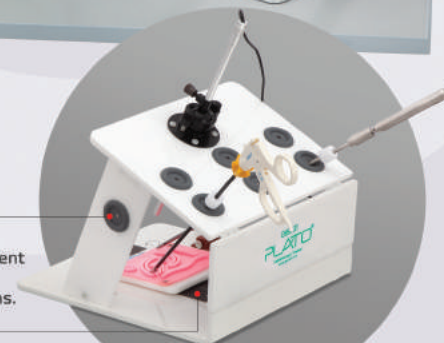

ADVANTAGEOUS FEATURES

TRAINING TASKS

IN ORDER TO PROVIDE A COMPREHENSIVE TRAINING EXPERIENCE, GERATI ALSO OFFERS A WIDE RANGE OF TRAINING TASK MODULES.

The GERATI Training Modules range from basic tasks that are aimed at improving Hand-Eye coordination, to advanced models that serve to provide an actual anatomical experience. This completes the students' essential training cycle of learning simple to advanced laparoscopic skills.

THE BASIC HAND-EYE COORDINATION TASKS have been developed to replicate the laparoscopic procedure instigating dexterity, depth perception and building muscle memory in the trainee.

Basic training tasks include:

DISSECTING & CUTTING, PEG TRANSFER, THREAD PASSING, BEAD PLACEMENT, BASIC SUTURING SKIN MODULE.

PLATO ET 514 SURGICAL SKILL TRAINING SIMPLIFIED

GERATI PLATO ET 514 Laparoscopic Endo Trainer is a portable device designed for mastering laparoscopic skills, intended for surgeons, gynecologists and urologists as part of their professional training program.

The set includes a light weight portable trainer, training exercise task modules, a set of laparoscopic instruments, exercise instruction manual and a shoulder carrying bag.

This trainer is unique as it does not require any electrical set up. It is used with either a tablet or smart phone with a camera. The camera is placed directly above a hole in trainer's top plate. The camera views the bottom plate reflecting its image on its screen. A training task placed on the bottom plate is thus viewable on the tablet or a smart phone's screen.

TRAINING ON THE GO
